That's the question that *How Safe Are Our Homes?* seeks to answer. This groundbreaking book uncovers the hidden dangers that could be lurking within your own home, from toxic chemicals to electromagnetic radiation.

In *How Safe Are Our Homes?*, you'll learn about the following dangers:

- Toxic chemicals in our cleaning products, furniture, and building materials

- Electromagnetic radiation from our cell phones, computers, and other electronic devices
- Mold and mildew in our homes
- Lead paint and other hazards in older homes

These are just a few of the dangers that could be lurking within your own home. And they're not just hypothetical risks. Studies have shown that these dangers can cause a variety of health problems, including:

- Cancer
- Reproductive problems
- Neurological problems
- Immune system problems

If you're concerned about the safety of your home, you're not alone. Millions of people are exposed to these dangers every day. But there is hope. By taking steps to reduce your exposure to these dangers, you can help protect your health and well-being.

How Safe Are Our Homes? provides practical advice on how to reduce your exposure to these dangers. You'll learn how to:

- Choose safer cleaning products, furniture, and building materials
- Reduce your exposure to electromagnetic radiation
- Prevent mold and mildew from growing in your home
- Test your home for lead paint and other hazards

By taking these steps, you can help create a healthier and safer home for yourself and your family.
