In *North*, award-winning photographer and naturalist Paul Nicklen takes us on an unforgettable expedition to witness these amazing migrations firsthand. We'll witness the polar bears of Churchill, Manitoba, as they gather on the shores of Hudson Bay to wait for the sea ice to form. We'll follow the caribou of the Porcupine River herd as they migrate more than 1,000 miles to their calving grounds in Alaska. And we'll see the beluga whales of the St. Lawrence Estuary as they make their annual journey to the Arctic Ocean.

Along the way, Nicklen shares his stunning photographs and insights into the lives of these remarkable animals. He tells stories of survival,

adaptation, and resilience, and he shows us the importance of protecting these fragile ecosystems.

North is a breathtaking celebration of the Arctic and its wildlife. It's a story of hope and resilience, and it's a reminder of the interconnectedness of all life on Earth.
