## **The Basics of Astrology**

The zodiac is a belt of 12 constellations that forms the backdrop against which the sun, moon, and planets move. The position of the celestial bodies at the time of your birth creates a unique birth chart that is said to influence your personality and life path.

The zodiac is divided into 12 signs, each of which is associated with a different element (fire, earth, air, or water) and a different set of qualities. The signs are:

\* Aries (March 21-April 19): Fire, cardinal \* Taurus (April 20-May 20): Earth, fixed \* Gemini (May 21-June 20): Air, mutable \* Cancer (June 21-July 22): Water, cardinal \* Leo (July 23-August 22): Fire, fixed \* Virgo (August 23-September 22): Earth, mutable \* Libra (September 23-October 22): Air, cardinal \* Scorpio (October 23-November 21): Water, fixed \* Sagittarius (November 22-December 21): Fire, mutable \* Capricorn (December 22-January 19): Earth, cardinal \* Aquarius (January 20-February 18): Air, fixed \* Pisces (February 19-March 20): Water, mutable

The planets are also important in astrology. Each planet represents a different aspect of our lives, such as our emotions (the Moon), our intellect (Mercury), our will (Mars), and our relationships (Venus).

The houses are 12 sectors of the zodiac that represent different areas of our lives, such as our home (the 4th house), our career (the 10th house), and our spirituality (the 12th house).
